The final number of subjects active in an experimental market may differ from the number of subjects initially recruited for it either due to inactivity of the subjects or due to technical disconnections before trading began. See also our OSF registry under osf.io/gu62n.

Data structure

Parameter	Description
treatment	configuration of the experimental market
game	sequence number of the experimental market under treatment treatment
round	index $T \in \mathbb{N}$ of the trading round in the experimental market
time	a measure $t_T \in \mathbb{N}$ of time within trading round T
id	ID of the player (unique within the dataset)
side	market side of the player (Buyer or Seller)
valuation	valuation (reservation price) of player i , β_i (if i is a buyer) or σ_i (if i is a seller)
bid	current value of player i 's bid β_i (if i is a buyer) or ask σ_i (if i is a seller)
price	deal price if player i 's bid/ask resulted in a match
match_id	ID of the player with whom player i was matched (in the case of a match)
match_time	time when the match was formed (in the case of a match)
type	Manual if the player manually entered the bid/ask Auto if the player clicked on the button to accept the best offer on the other side of the market
status	Expired if the bid/ask expired (after 10 seconds) Replaced if the player replaced the bid/ask before it expired Accepted if the bid/ask resulted in a deal

Treatment overview

1 Regular markets

1.1 Full feedback (baseline)

Full1 Regular, Full PI, First price (October 2016)

Proposed experimental scheme:

- **10 rounds** (120 seconds each), **10 buyers**, **10 sellers**
- **Buyer valuations:** [148, 143, 138, 133, 128, 123, 118, 113, 108, 103]
- **Seller valuations:** [73, 78, 83, 88, 93, 98, 103, 108, 113, 118]
- **CE range:** [108, 113], **gains of trade:** 320, **equilibrium quantity:** 8

1.2 Other-side feedback

Other Regular, [Other-side PI](#), First price (October 2016)

Proposed experimental scheme:

- **10 rounds** (120 seconds each), **10 buyers, 10 sellers**
- **Buyer valuations:** [148, 143, 138, 133, 128, 123, 118, 113, 108, 103]
- **Seller valuations:** [73, 78, 83, 88, 93, 98, 103, 108, 113, 118]
- **CE range:** [108, 113], **gains of trade:** 320, **equilibrium quantity:** 8

1.3 Same-side feedback

Same Regular, [Same-side PI](#), First price (October 2016)

Proposed experimental scheme:

- **10 rounds** (120 seconds each), **10 buyers, 10 sellers**
- **Buyer valuations:** [148, 143, 138, 133, 128, 123, 118, 113, 108, 103]
- **Seller valuations:** [73, 78, 83, 88, 93, 98, 103, 108, 113, 118]
- **CE range:** [108, 113], **gains of trade:** 320, **equilibrium quantity:** 8

SameMMK Regular, [Same-side PI](#), [Matchmaker keeps](#) (October 2016)

Proposed experimental scheme:

- **10 rounds** (120 seconds each), **10 buyers, 10 sellers**
- **Buyer valuations:** [148, 143, 138, 133, 128, 123, 118, 113, 108, 103]
- **Seller valuations:** [73, 78, 83, 88, 93, 98, 103, 108, 113, 118]
- **CE range:** [108, 113], **gains of trade:** 320, **equilibrium quantity:** 8

1.4 Black Box feedback

BB Regular, [Black Box](#), First price (November 2016)

Proposed experimental scheme:

- **10 rounds** (120 seconds each), **10 buyers, 10 sellers**
- **Buyer valuations:** [148, 143, 138, 133, 128, 123, 118, 113, 108, 103]
- **Seller valuations:** [73, 78, 83, 88, 93, 98, 103, 108, 113, 118]
- **CE range:** [108, 113], **gains of trade:** 320, **equilibrium quantity:** 8

BBRandomRegular, **Black Box**, **Random price** (November 2016)

Proposed experimental scheme:

- **10 rounds** (120 seconds each), **10 buyers**, **10 sellers**
- **Buyer valuations:** [148, 143, 138, 133, 128, 123, 118, 113, 108, 103]
